# Groupe Identification

Pour l'installation du docker veuillez installer docker et docker compose sur votre machine.

Après cela munissez-vous du fichier .zip qui vous de notre code source et mettez le dans votre répertoire courant.

Après cela, vous avez juste besoin de faire :

```
1.  docker compose up
```
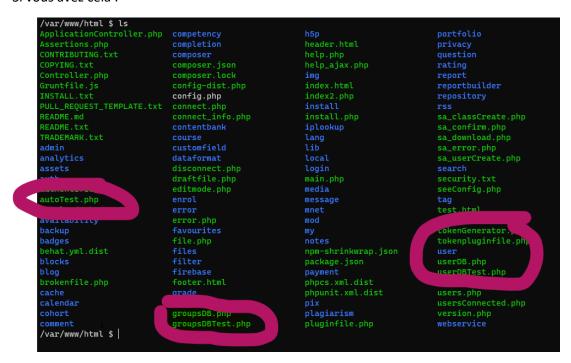

Et attendre. Cela va se faire automatiquement.

Attendez-vous d'arriver ici :

```
identification-moodle-1    | Upgrading moodle...
identification-moodle-1    | PHP Warning:  Failed to set memory limit to 0 bytes (Current memory usage is 2097152 bytes)

```

Ce n'est pas normal.

Vous devez avoir des dossiers avec Controllers, model ect…

Comme ici :

| Name | Last commit | Last update |
|---|---|---|
| .. | | |
| controllers | merge rasberry | 1 week ago |
| model | adaptation du code à la nouvelle versioin | 3 weeks ago |
| static | update with dev-local | 1 month ago |
| test | add script downloadMoodleBox.sh | 1 month ago |
| vendor | ajout de l'API REST | 3 weeks ago |
| views | résolution de bug | 1 week ago |
| config2.php | code intégrée au rabserry | 2 months ago |
| index2.php | Update index2.php | 5 days ago |
| logs.txt | résolution de bug | 1 week ago |
